PROFESSIONAL EXPERIENCE

Freelancer

February 2022 - Present

- Proficient in web development languages: HTML, CSS, JavaScript, and SQL.
- Experienced in building responsive and user-friendly web applications using frameworks such as React and Bootstrap.
- Skilled in creating visually appealing designs and prototypes using tools like Figma and Photoshop.
- Knowledgeable in version control systems like Git for efficient collaboration and code management.
- Capable of integrating APIs to enhance the functionality of web applications.
- Familiar with SEO techniques to optimize website performance and search engine rankings.
- Proficient in using NPM (Node Package Manager) to manage project dependencies and packages.
- Possess a strong understanding of UI/UX principles to deliver an exceptional user experience.

Projects:

Weather App (JavaScript-based)

- Developed using HTML, CSS, JavaScript, and API integration.
- Utilized an external weather API to fetch real-time weather data based on user input.
- Implemented responsive design principles using Flexbox and media queries
- Integrated SEO to improve the app's visibility in search engine results.
- Incorporated error handling and validation to ensure accurate data retrieval and display.

Weather App (React-based)

- Developed using HTML, CSS, React and API integration.
- Utilised React components and state management to create a modular and scalable application structure.
- Used Bootstrap framework and CSS media queries for optimal user experience on different devices.
- Integrated weather data from an API and dynamically rendered it in the user interface.
- Employing Git version control for efficient code management and collaboration.
